## **DETAILED ACTION**

1. Responsive to communication of 10/30/2003. Application 10/695,935 has been examined. In the examination of 10/695,935, claims 1-6 are pending.

## Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 1, drawn to a method of crosstalk analysis involving calculation of line pitch, classified in class 716, subclass 5.
  - II. Claims 2, 4 and 5, drawn to a crosstalk checking method involving cell drive capability, classified in class 716, subclass 5.
  - III. Claim 3, drawn to a crosstalk checking method involving extracting a clock net, classified in class 716, subclass 5.
  - IV. Claim 6, drawn to a crosstalk checking method involving a hierarchically designed layout, classified in class 716, subclass 5.
- 3. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I, II, III and IV has separate utility such as calculation of line pitch, cell drive capability, extracting a clock net and a hierarchically designed layout. See MPEP § 806.05(d).

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Application/Control Number: 10/695,935

Art Unit: 2825

- 5. Because these inventions are distinct for the reasons given above and a different search is required for the distinct subject matter in Groups I, II, III and IV, restriction for examination purposes as indicated is proper.
- 6. A telephone call was made to Ramyar Farid (Registration No. 46692) on 07/07/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

## Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nelson Lam whose telephone number is 571 272-8318. The examiner can normally be reached on 9am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew Smith can be reached on 571 272-1907. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
